

Journal of Orthopaedic Surgery and Research Case Reports

Journal of Orthopaedic Surgery and Research Case Reports publishes Clinical Images in Orthopaedic Surgery, Case Reports in Orthopaedics Research, Case Series in Orthopaedic Surgery, Clinical Video in Orthopaedic Surgery, Orthopaedics Research Articles.

Orthopaedic Surgery experts uses the latest techniques and technology to improve care for people with musculoskeletal problems. From diagnosis through treatment of disorders of the bones, joints, ligaments, tendons, muscles and nerves (musculoskeletal system). Subspecialties within the department include adult reconstruction, pediatrics, sports, trauma, spine, foot, hand, shoulder, elbow and orthopaedics oncology.

Journal of Orthopaedic Surgery and Research Case Reports is an open-access peer-reviewed, International Orthopaedic journal, Editorial board based journal welcome Articles from Medical College Faculty, Ortho Students, Orthopaedic Surgeons, Orthopaedics Researchers, Scientists and Nursing Members, The journal committed to publishing high-quality articles in the field of Orthopaedics Research & Studies from Orthopaedics and Spine Surgery, Rheumatology, Traumatology, Arthritis, Arthroplasty, Exercise and Sports Medicine, Fractures, General Orthopaedics, Hand & Wrist, Hip & Knee Reconstruction, Tendon Research, Joint replacement surgery, Musculoskeletal Disorders, Orthopaedics Bio-mechanics Research, Orthopaedics Surgery, Orthopaedics Trauma, Orthopaedics: Diagnostic Techniques, Osteoporosis, Paediatric orthopaedics, Physical medicine and rehabilitation, Physiotherapy, Podiatry, Shoulder & Elbow, Basic Science, Rehabilitation and Physiotherapy, Orthopaedics Nursing and Orthopaedics Education. The types of articles accepted include Original Research Articles, Review articles, Reviews, Editorials, Medical news, Case reports, Clinical images, Case Series, Clinical videos, Short communications, Images in medical practice.

Journal Scope and Keywords: Journal of Orthopaedic Case Reports: Home, Journal of Orthopaedic Surgery and Research | Home page, Case report - Journal of Orthopaedics and Traumatology, Case Reports in Orthopedics, Case Reports in Orthopedic Research, Submissions | Journal of Orthopaedic Case Reports, Journal of Orthopaedic Research, Clinics in Orthopedic Surgery.

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission Portal: <https://www.orthopaedicsurgeryjournal.org/submit.html>

(or) also invited to submit through the Journal E-mail Id: editor@orthopaedicsurgeryjournal.org

Journal of Spine Surgery Case Reports

Case Reports in Spine Surgery Journal is allows surgeons to decompress, move and fix vertebral structures, and replace them if necessary. Back surgery is an option to consider when conservative treatments have not worked and the pain remains persistent and prevents the development of a normal life. There are several types of back surgery: Discectomy: This involves removing the herniated part of the disc to access the swollen nerve and relieve its irritation. Laminectomy: The bone covering the vertebrae is removed and enlarged to relieve pressure from a stenosis. Fusion: Spinal fusion consists mainly of joining two or more bones of the spine together. This can relieve pain by giving stability to a fracture or simply to eliminate the pain that begins with the movement of the vertebrae, which can degenerate or injure some of the vertebral discs. Disc implant: As an alternative to fusion, there is the implant of a disc, although it cannot be used by everyone.

Case Reports in Hand and Wrist Surgery Journal

Journal of Hand and Wrist Surgery Case Reports it is used to correct a variety of injuries and conditions. While it is not the first treatment option for anyone, there are situations when surgery is inevitable. If your hand or wrist pain is interfering with your functionality or quality of life, surgery may be the answer. The experts at the Centre for Orthopaedic Surgery and Sports Medicine have a wealth of experience diagnosing and treating hand and wrist conditions and injuries. They can treat you using state-of-the-art nonsurgical and surgical treatments.

Case Reports in Shoulder and Elbow Surgery Journal

Journal of Shoulder and Elbow Surgery Case Reports Shoulder surgery: Shoulder replacement, Rotator cuff tears, Instability and sports injuries, Fractures and other injuries, Joint preservation for arthritis, Scapular disorders, Elbow surgery: Elbow replacement, Elbow arthroscopy, Sports injuries, Fractures and other injuries.

Journal of Arthritis Surgery Case Reports

Case Reports in Arthritis Surgery Journal Arthritis is the name for inflammation or swelling of a joint. Source of arthritis affect the joints, the surrounding tissues, and other connective tissues. Common treatments for arthritis include anti-inflammatory medications, physical therapy, occupational therapy, assistive aids, and nonpharmacological therapies. If standard treatments do not work or the joints become too damaged, arthritis surgery may be necessary. This article discusses the different types of arthritis surgery and their benefits: reducing joint pain, improving joint function, preventing further joint damage, helping the person reduce their use of anti-inflammatory drugs, improving mobility, improving daily functioning, improving quality of life, delaying the need for more intensive surgery, such as a joint replacement.
