

Journal of Hip Surgery Case Reports

Journal of Hip Surgery Case Reports publishes Clinical Images of Hip Fracture, Case Reports in Hip Replacement, Case Reports in Hip Arthroplasty, Case Reports in Hip Joint Surgery, Case Series in Hip Surgery, Video Case Reports in Hip Surgery, Case Reports in Hip Surgery and Rehabilitation.

Hip Surgery and Total Hip Replacement: A surgeon removes the damaged sections of the hip joint and replaces them with parts usually constructed of metal, ceramic and very hard plastic. This artificial joint (prosthesis) helps reduce pain and improve function. also called total hip arthroplasty, hip replacement surgery might be an option if hip pain interferes with daily activities and nonsurgical treatments haven't helped or are no longer effective. Arthritis damage is the most common reason to need hip replacement.

Journal of Hip Surgery Case Reports publishes articles related to the field of surgery of the hip in all of its forms including, but not limited to, trauma, reconstruction, and sports-related topics. with an editorial board comprising master surgeons and researchers from across the globe, the journal publishes internationally focused articles on clinical and basic scientific research in all specialties of hip surgery. Journal of Hip Surgery Case Reports will report on outcomes, complications, tribology, biomaterials, biomechanics, metallurgy, as well as newer prosthetic designs, especially as they relate to unexpected consequences. Educational Case reports as well as Review articles, Case Series, Clinical Images, Video Surgery Case Reports and meta-analyses will be welcomed. Articles pertaining to Arthroplasty, Joint preservation, Arthroscopic Surgery and Sports Medicine, Pediatrics, Trauma, and associated disorders of the hip including Tumors, Osteonecrosis, and metabolic disorders will also be considered.

The goal of the Journal of Hip Surgery Case Reports is to publish and disseminate peer-reviewed articles to all practitioners in the medical field including those who perform surgery, those who care for patients requiring surgery, and to the institutions in which surgeons can perform state-of-the-art procedures. We hope that in doing so, we can help achieve the highest level of patient care and to provide the highest quality outcomes. It is only through spreading and sharing the knowledge of researchers, innovators, and thought leaders that we can advance the art. Importantly, the timeline from submission to review and then to publication will be short.

Journal Scope and Keywords: Journal of Hip Surgery, Journal of Hip Preservation Surgery, Hip surgery collection | Journal of Surgical Case Reports, HIP International, Turkish Journal of Hip Surgery, Total Hip Arthroplasty Techniques, The Journal of Arthroplasty, Advances in Hip Replacement Surgery, Positive Effect of Patient Education for Hip Surgery, Total hip replacement: indications for surgery and risk factors.
